Le bidonville de Dharavi : 1 million de personnes y vit. La municipalité aimerait le raser pour construire des immeubles, mais la majorité des habitants refuse de quitter le bidonville. Un logement s'y loue 15 € par mois en moyenne, beaucoup moins que dans le reste de la ville.

attendant, le ressac des déplacés va toujours plus loin. Jusqu'à la mangrove, au nord de la ville, et jusqu'au parc national Sanjay Gandhi, là voisinent des cahutes de tôle, des cités standardisées et la forêt. Un territoire où les attendent de nouveaux voisins qui eux aussi tiennent à défendre leur espace : des léopards. Les habitants affirment en avoir déjà aperçu, rôdant le long des «vertical slums» et chassant dans les cages d'escaliers.

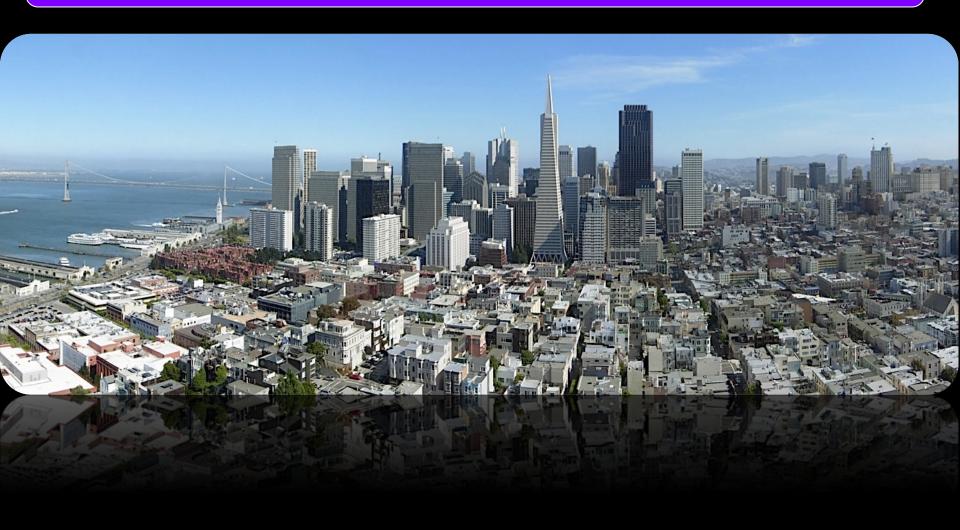

1 milliard d'humains vivent dans des bidonvilles! Ici, celui de Mexico: 4 millions d'habitants, trafic de drogue, insalubrité.

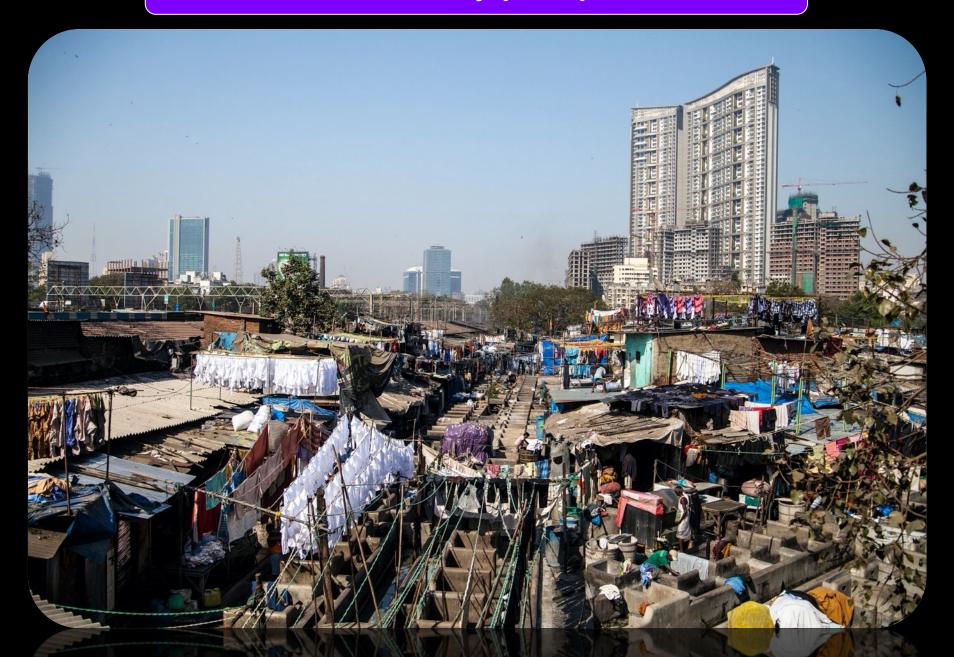

Celui de Nairobi : 2 millions de personnes, sans eau ni électricité, égouts à ciel ouvert, malaria, 50% de sidéens
